Dear Hiring Manager,

I am writing to express my strong interest in a Web Development opportunity within your organization. As a Bachelor of Computer Applications (BCA) student at Graphic Era Hill University, I have gained a solid foundation in front-end and back-end web technologies including HTML, CSS, JavaScript, PHP, and MySQL.

Throughout my academic journey, I have worked on multiple real-world projects that have honed both my technical and problem-solving skills. During a 24-hour hackathon, I built a fully functional **Food Delivery Website** with responsive design and secure database integration using PHP and MySQL. I also developed a live platform called **GEHU PYQs**, which enables students to access previous year question papers in an organized and secure manner. This platform includes admin-controlled uploads, course-wise subject filters, dark mode, and session-based login — built using core web technologies.

Additionally, I recently completed a **Database Internship**, where I designed ER diagrams, implemented stored procedures, and built a full **College Management System** using MS SQL Server. This experience strengthened my understanding of database structures, query optimization, and data handling in production environments.

Beyond development, I've expanded my skillset through certifications in **Web Development**, **Data Analytics**, and **AI Prompt Engineering**, enabling me to stay updated with current trends and tools.

I am enthusiastic about contributing to impactful projects and growing as a developer in a collaborative and innovation-driven environment. I would welcome the opportunity to bring my skills and passion to your team and discuss how I can contribute to your success.

Thank you for your time and consideration.

Sincerely,

Vinod Bhatt
